

Self-Introduction :

Good morning/afternoon, dear teachers:

I am glad to be here for this interview. First, let me introduce myself to you. My name is Wujian, 21 years old. I will graduate from Anhui University of Technology this June. I hope I could get the opportunity to finish my postgraduate courses in Anhui University. I have the confidence because I have such ability! I won the school scholarship for three consecutive years, and I also passed CET4 and CET6. And because of my positive attitude and good grades, I am also honored to be a probationary member of the Communist Party of China, and will also become a regular member in May this year. I love computer science and I want to get a chance to continue my study. I also have a desire to study for a doctorate. These are all for my self-introduction. If I am lucky enough to get the chance, I will devote all myself to my major and focus all of my energy on it.

Reasons for my choice(考研原因):

Firstly, I have a profound love in computer science, which is very practical and useful. Through for years' study in my university I find the knowledge I have mastered is not enough to solve some specific problems though I have satisfactory marks in all the subjects. So I decide to further my education and take the postgraduate entrance examination.

Secondly, I want to take computer science as my life long career, therefore, further study in this field is still necessary. In my opinion, I can broaden my horizon and enrich the knowledge in the future as well.

Last but not the least, I also have a desire to study for a doctorate.

That's all, thank you for listening.

Where are you from?

I am from Tongling, a small city in the south of Anhui Province. Tongling is famous for its copper production and is one of the important birthplaces of the bronze culture of the Chinese. And Tongling is known as the ancient bronze capital of China and the contemporary copper base. Tongling is also a livable city. But aging society is a bit serious.

Do you have any hobbies? Advantage and disadvantage?

In my spare time, I often go to library to read books, listen to music and communicate with my friends. I also like coding, so I often search for material online to solve my problems. And it exercises my ability of reading English. Coding is one of my favorite hobbies. I also have some disadvantages, obviously, I lack some sports activities, but now I am trying my best to do exercise to lose weight.
